1. During my recent trip to the [REDACTED] at Palo Alto, California, I had a discussion with [REDACTED] who is [REDACTED] Vice President and General Manager. [REDACTED] stated that he would be in Washington in mid-May and would call upon [REDACTED] and Mr. Lundahl to discuss a proposed photo interpretation support program.

2. This program was first suggested in a letter from [REDACTED] dated 22 March 1963. Essentially, [REDACTED] proposes to provide a photo interpretation key which will give an assessment of the economic status of foreign countries in which we may be interested. The basis for this key would be the evaluation of photography taken mostly in California, which would provide a diversity of industrial, agricultural and natural characteristics necessary for a very thorough study. In addition, and possibly the most important aspect is that the proposal recommended the establishment of an auxiliary photo interpretation facility at [REDACTED] to provide appropriate data to NPIC.
